II- ACCOUNTING PERIOD AND ACCOUNTING MONETARY UNIT

1- Accounting period: The DIC Group's accounting period for the year 2025 commences on January 1, 2026 and ends on December 31, 2026.

2- Accounting monetary unit: The DIC Group maintains its accounting records in Vietnam dong (VND).

III- ACCOUNTING STANDARDS AND ACCOUNTING SYSTEM:

1- Accounting system: The DIC Group is applying Vietnamese Accounting System promulgated together with Circular No. 99/2025/TT-BTC dated October 27, 2025 issued by the Ministry of Finance.

2- Announcement on compliance with Vietnamese Accounting Standards and Accounting System: The DIC Group applies Vietnamese Accounting Standards and supplement documents issued by the State. Financial statements are prepared in accordance with regulations of each standard and supplement documents as well as with current accounting system.

3- Applied accounting form: The DIC Group applies the Voucher-Based Journal Entry Accounting System.

IV- ACCOUNTING POLICIES:

1. Recognition principles for cash and cash equivalents

Foreign currency transactions arising from economic activities are translated into Vietnamese Dong using the exchange rate at the transaction date. At year-end, foreign currency-denominated items are retranslated using the buying exchange rate of the bank where the Corporation holds its account, as announced on the closing date of the accounting period.

The actual foreign exchange differences arising during the year and those resulting from the revaluation of year-end balances of monetary items are recorded in financial income or financial expenses in the financial year.

Cash equivalents are short-term investments with original maturities of no more than three months from the acquisition date, which are readily convertible into known amounts of cash and subject to insignificant risk of changes in value at the reporting date.

2. Recognition of financial investment

Investments in subsidiaries and associates are stated at original cost. Distributions from accumulated net profits from subsidiaries and associates arising subsequent to the date of acquisition are recognized in the Income Statement. Other distributions received (in excess of such profits) are considered a recovery of investment and are deducted to the cost of the investment.

Investments in joint ventures are accounted for using the cost method. The joint venture contribution is not adjusted for changes in the Company's ownership interest in the joint venture's net assets. The Corporation's income statement reflects the income distributed from the accumulated net profits of the joint venture arising after the joint venture contribution.

Securities investment at the balance sheet date, if:

- Investments with a maturity or redemption period of no more than three months from the acquisition date are classified as cash equivalents;

- Investments with a redemption period of less than one year or within one operating cycle are classified as short-term assets;

- Investments with a redemption period of more than one year or exceeding one operating cycle are classified as long-term assets;

Provisions for devaluation of investments are made based on the excess of original cost in accounting books over their market value at year-end. For some other investments, because there is not enough necessary information to set up provisions, the Corporation does not set up provisions for these investments. The Board of Directors of the Corporation believes that provisions for these investments, if any, do not have a material impact on the financial statements.

3. Recognition of receivables

Track each receivable in detail for each subject, regularly compare, check, and urge timely payment.

Check and compare periodically or at the end of the year each receivable arising, the amount collected, the amount still to be collected, especially for subjects with frequent trading and purchasing relationships, with large receivable balances.

For debts with foreign currency origin, they are tracked in both original currency and converted to Vietnamese currency. At the end of each period, the balance is adjusted according to the actual exchange rate.

Classify receivables according to payment time as well as each subject to have measures for collection or payment.

4. Principle of evaluating inventories

Inventories are stated at original cost. The cost of inventories should comprise all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventory at the year-end is calculated by weighted average method.

The Corporation applies the perpetual method to record inventory.

5. Recording principle of tangible and intangible fixed assets

Fixed assets are stated at the original cost. During the using time, fixed assets are recorded at cost, accumulated depreciation and net book value.

Depreciation is provided on a straight-line basis. Depreciation period is estimated as follows:

- Building and structures	06 – 25 years
- Machinery & equipment	04 – 08 years
- Means of transportation	06 – 10 years
- Management equipment	03 – 06 years
- Others	03 – 05 years
- Land use rights	38 years

6. Principle of Deferred corporate income tax

Deferred corporate income tax expense is determined on the basis of deductible temporary differences, taxable temporary differences and corporate income tax rates.

7. Recognition and allocation of prepaid expenses

Prepaid expenses only related to present fiscal year are recognised as short-term prepaid expenses and are recorded into operating costs.

The calculation and allocation of long-term prepaid expenses to profit and loss account in the period should be based on nature of those expenses to choose reasonable method and allocated factors. Prepaid expenses are allocated partly into operating expenses on a straight-line basis.

8. Principal of payables

Liabilities are tracked in detail, including the amounts payable and amounts already settled for each creditor.

Liabilities are classified into short-term and long-term based on their respective payment terms.

Payables denominated in gold, silver, precious metals, and gemstones are recorded in detail by creditor, including both quantity and value based on the prescribed valuation.

At the end of the accounting period, the balances of foreign currency-denominated payables are revalued using the prescribed exchange rate.

For creditors with frequent transactions, regular purchases, or large outstanding balances, the accounting departments are responsible for reviewing and reconciling the liabilities incurred with each creditor, and periodically confirming such balances in writing.

9. Principal of loan and finance lease

The payment terms of loans and financial leasing debts are monitored in detail. Amounts with a repayment period of more than 12 months from the date of the financial statements are presented as long-term loans and financial leasing debts. Amounts due within the next 12 months from the date of the financial statements are presented as short-term loans and financial leasing debts for payment planning.

Borrowing costs directly related to the loan (other than interest payable), such as appraisal, auditing, loan application preparation costs, etc. are accounted for in financial expenses. In case these costs arise from a separate loan for the purpose of investment, construction or production of unfinished assets, they are capitalized.

For financial leasing debts, the total lease debt reflected on the credit side of account 341 is the total amount payable calculated by the present value of the minimum lease payment or the fair value of the leased asset.

The Corporation shall account in detail and monitor each lending and debtor, each loan agreement and each type of loaned asset.

When preparing the Financial Statements, the balance of loans and financial leases in foreign currencies shall be re-evaluated at the actual transaction exchange rate at the time of preparing the Financial Statements.

Exchange rate differences arising from the payment and re-evaluation at the end of the period of loans and financial leases in foreign currencies shall be recorded in financial operating revenue or expenses.

10. Recognition and capitalization of borrowing costs

Borrowing costs are recognized into operating costs during the period, except for which directly attributable to the acquisition, construction or production of a qualifying asset included (capitalized) in the cost of that asset, when gather sufficient conditions as regulated in SAV No. 16 "Borrowing costs".

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset should be included (capitalized) in the cost of that asset, includes interest on borrowings, amortization of discounts or premiums relating to issuing bonds and ancillary costs incurred in connection with the arrangement of borrowings.

11. Recognition of accrued expenses.

Expenses not yet occurred may be accrued into production and operating expenses in order to ensure when these expenses arise, they do not make material differences on production and operating expenses on the basis of matching between revenue and cost. When these expenses arise, if there is any difference with the amount charged, accountants additionally record or decrease cost equivalent to the difference.

12. Principle of recognizing unrealized revenue

Unrealized revenue of the Corporation is recorded according to the current corporate accounting regime. For leased assets that have been prepaid by customers, revenue for the accounting period is recorded on the basis of allocating the prepaid amount to the number of lease years.

13. Owner's equity

Owner's equity are recognised by the real contributed capital.

Share capital surplus is recorded as the larger difference between the actual issuance price and the par value of shares when issuing shares for the first time, issuing additional shares or reissuing treasury shares.

Undistributed profit after tax is the profit from the enterprise's operations after setting aside funds and distributing dividends.

14. Recognition of revenue

Revenue from sale of goods

Revenue from sale of goods should be recognized when all the following conditions have been satisfied:

- The significant risks and rewards of ownership of the goods have been transferred to the buyer;

- The DIC Group retains neither continuing managerial involvement as a neither owner nor effective control over the goods sold;

- The amount of revenue can be measured reliably;

- The economic benefits associated with the transaction of goods sold have flown or will flow to the DIC Group;

- The costs incurred or to be incurred in respect of the transaction of goods sold can be measured reliably.

Revenue from rendering of services

Revenue from rendering of services is recognized when the outcome of that transaction can be measured reliably. Where a transaction involving the rendering of services is attributable to several periods, each period's revenue should be recognized by reference to the stage of completion at the balance sheet date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- The amount of revenue can be measured reliably;

- It is probable that the economic benefits associated with the transaction will flow to the DIC Group;

- The stage of completion of the transaction at the balance sheet date can be measured reliably;

- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

The completed portion of service provision is determined based on the work completion assessment method.

Construction contract revenue

The completed work portion of the Construction Contract that serves as the basis for determining revenue is determined according to: The value of completed volume, construction volume confirmed and accepted by the investor as the basis for recording revenue in the period.

Financial income

Income from interest, royalties and dividends and other financial income earned by the DIC Group should be recognised when these two conditions are satisfied:

- It is probable that the economic benefits associated with the transaction will flow to the DIC Group;

- The amount of the income can be measured reliably.

Dividends, distributed profits should be recognised when the DIC Group's right to receive payment is established or right to receive profits from the capital contribution.

15. Revenue deductions

The Corporation's revenue deductions are returned goods and customers' violations of commitments in real estate transfer contracts.

16. Recognition cost of goods sold

- Cost of construction and installation activities is determined by (=) actual costs incurred corresponding to completed volume.

- Cost of transferring land use rights, real estate (=) Total investment costs divided by (:) Total business area multiplied by (x) Area sold during the period

17. Principles and methods of recoding financial expenses

Expenses are recorded in financial expenses consist of:

- Expenses or losses relating to financial investment activities;

- Expenses of capital lending and borrowing;

- Losses incurred when selling foreign currency, exchange rate losses;

- Provision for impairment of trading securities, investment loss reserves in other units.

The above amounts are recorded according to the total amount arising in the period, not offset against financial revenue.

18. Principles and method of recording current income tax expense, deferred income tax expense.

Current income tax expense is calculated basing on taxable profit and income tax rate applied in the current year.

V. ADDITIONAL INFORMATION TO ITEMS IN BALANCE SHEET

(All amounts are presented in Vietnamese Dong, unless otherwise indicated in another currency)

Bonds issued: BOND DIGH2326 (19b- Long-term loan):

These are the funds mobilized by issuing common bonds with face value in Vietnamese Dong by Ho Chi Minh City Development Joint Stock Commercial Bank (HDBank), including two (2) Bonds with a total face value of VND 1,600,000,000,000, details:

- Bond DIGH2326001: Total value of VND 600,000,000,000, term of 36 months, maturing on December 29, 2026. The interest rate for the fith interest period (from december 29, 2025 to june 29, 2026) is 11.70% per annum.

- Bond DIGH2326002: Total value of VND 1,000,000,000,000, term of 36 months, maturing on March 25, 2027. The interest rate for the fourth interest period (from september 25, 2025 to march 25, 2026) is 11.70% per annum.

The interest rate applied for the first two interest periods (the first twelve (12) months) is 11.25% per annum. For subsequent periods, the interest rate is determined as the sum of: (i) 4.00% per annum; and (ii) the 12-month savings deposit interest rate for individual customers (postpaid, end-of-term) of HDBank at the interest rate determination date.

These bond issuances are secured by a payment guarantee from Ho Chi Minh City Development Joint Stock Commercial Bank (HDBank)

On October 21, 2025, DIC Group issued Resolution No. 117/NQ-DIC Group-HĐQT approving the early settlement of bonds with codes DIGH2326001 and DIGH2326002.

On November 27, 2025, DIC Group repurchased VND 800,000,000,000 of bonds with code DIGH2326002.

On January 27, 2026, DIC Group repurchased VND 200,000,000,000 of bonds with code DIGH2326002 and 600,000,000,000 of bonds with code DIGH2326001.
